

Hazard Identification Training Course

When: Tuesday 3rd April 2018 - 1 day course

Where: London, UK

Institution of
**MECHANICAL
ENGINEERS**

This programme provides an understanding and awareness of the tools and techniques available for hazard identification, where they can be applied and what limitations may exist.

Hazard identification is the first step of the risk assessment process and a hazard missed is a hazard uncontrolled.

As an engineer you must take responsibility for controlling the hazards and risks throughout engineering processes in order to maintain safe operating procedures and minimise loss.

You will be introduced to the concept of HAZID, including the HAZID team and process, and a range of other hazard identification techniques.

At the end of the course you will be able to:

- Assess the role of hazard identification in the risk management process
- Critically review the tools and techniques available to carry out effective hazard identification at each lifecycle stage
- Design a fit-for-purpose hazard identification study

Who should attend?

This programme is suitable for managers, engineers, operators, HSE advisors and risk management practitioners.

Course Location and Date

Location: One Birdcage Walk, London, SW1H 9JJ

Date: Tuesday 3rd April 2018 - 1 day course
